MKS

APPLICATION LIFECYCLE MANAGEMENT FOR THE ENTERPRISE

MKS delivers a **proven solution** for **application lifecycle management** that helps global companies **boost productivity, increase visibility** and **meet compliance goals.**

ONE OPPORTUNITY

You are seeking to mature your organization, align IT and software engineering goals with business needs, while reducing complexity and cost. You must respond with agility to shifting market demands, deliver new services faster and with greater efficiency, all in a climate of regulatory control.

MKS delivers a proven solution for application lifecycle management that helps global companies boost productivity, increase visibility and meet compliance goals.

Our single platform for application lifecycle management brings control to the chaos, allowing you to achieve higher levels of productivity, gain visibility across global development operations — offshore and on — and put in place an environment of auditability and change control to satisfy the most rigorous compliance requirements.

Global enterprises around the world seeking to manage technology change choose MKS.

ONE WITH BUSINESS RESULTS:

One of the US's largest wireless providers turned to MKS to support consolidation of enterprise billing systems, resulting in an astounding 2 percent reduction in the cost of IT as a percentage of revenues.

ONE PLATFORM

Our technology does far more than bring global software engineering and IT organizations under control. It provides the processes that govern the day to day workings of technology teams, allowing you to compete more effectively, work more efficiently and serve the business with greater assurance.

Application lifecycle management (ALM) — A single ALM platform connects every stage of software development, binding diversity and linking application development and IT operations teams. MKS's approach, made unique by our single architecture, provides requirements management, software change and configuration management, test management, deployment management and portfolio management unified by a powerful, yet flexible process.

MKS's platform offers:

- Increased productivity
- Real-time global collaboration
- Complete lifecycle traceability for compliance
- Process flexibility
- Adaptability into existing software infrastructure
- Proven scalability across teams, projects, geographic sites and users
- Real-time analytics for increased visibility and control

We have one market, one platform and one vision.

ONE WITH BUSINESS RESULTS:

The world's third largest bank has selected MKS as its company wide ALM standard as it evolves from individual developer groups, satisfying local business needs, towards centralized services deployed to branches around the world. MKS provides the foundation for a global development model where the bank develops once, reuses often, and deploys worldwide resulting in dramatic IT cost savings.

ONE VISION

MKS is a technology leader and innovator. Our history has been marked with firsts to market as well as research and development excellence: **we were the first to introduce a modern end to end platform for ALM** — a feat still unrivaled by our competitors.

We continue to **lead the market with our seamless approach** to application lifecycle management — a solution that not only offers you enhanced business performance by **breaking down existing tool and process silos**, but dramatically **lowers your operating costs and complexity.**

ONE WITH BUSINESS RESULTS:

With MKS as their standard, software engineering teams in a global financial services firm are collaborating more efficiently and cost effectively to deliver new and better services to Automated Teller Machine (ATM) customers around the world.

ONE TEAM

Around our technology, we have built an organization based on customer success and long lasting relationships with the companies we serve.

We support the largest enterprises in the world and their complex technology environments with a global network of field consultants, partners and support professionals all focused on achieving tangible results and able to adapt to our customers' ever-changing business needs.

MKS offers an array of services providing solutions to common challenges facing IT and software engineering shops:

- Software and process maturity
- Regulatory compliance and governance
- IT service management
- Development best practices
- Requirements management
- Metrics and measurement
- Application rationalization

Our team is focused on driving tangible business results for customers.

ONE WITH BUSINESS RESULTS:

"We selected MKS for its people and support just as much as for its technology, and are confident that the value MKS brings to our business and to our customers will allow us to continue this mutual commitment to excellence far into the future."

Jeff Emerson, CIO, Magellan Health Services

ONE with CUSTOMERS
