

## What's New in Implementer® 2006

Implementer 2006 consists of over 250 changes. Here are the highlights.

| <u>What's New</u>                              | <u>Benefits to You</u>  |
|--|---|
| <b>Integration with MKS Source</b>             |   |
| Single Secure Repository                       | <ul style="list-style-type: none"> <li>Centralized repository for the entire enterprise including IBM System i5 source.</li> </ul>  |
| Direct Host and GUI interactions               | <ul style="list-style-type: none"> <li>MKS Source client interface is directly accessible from Implementer host-based panels for visual member history, comparisons and annotated viewing of source.</li> </ul>   |
| Portfolio Management enabled                   | <ul style="list-style-type: none"> <li>Native System i5 applications fully leverage MKS Integrity Portfolio Management features.</li> </ul>   |
| <b>Impact Analysis</b>                         |   |
| Copy books supported                           | <ul style="list-style-type: none"> <li>Copy book references for RPG, COBOL, and C are included on all impact analysis panels and utilized in auto analyze feature of Implementer promotions. Drill through "net-change" QA configurations also supported.</li> </ul>                    |
| External data structures                       | <ul style="list-style-type: none"> <li>RPG External data structures and externally defined files for COBOL and C are available in all impact analysis features.</li> </ul>  |
| Hawkeye enabled                                | <ul style="list-style-type: none"> <li>New copy book support can utilize either Hawkeye or Implementer native repository.</li> </ul>  |
| <b>Repository Loader</b>                       |   |
| Simplified user interface                      | <ul style="list-style-type: none"> <li>New Repository Loader Report explicitly identifies problem source and objects with legend-driven resolutions.</li> </ul>   |
| Net change load now supported                  | <ul style="list-style-type: none"> <li>Repository will only reload what has changed allowing retention of existing custom object codes.</li> </ul>  |
| <b>Improved Audit Oriented Features</b>        |   |
| New Verification Report                        | <ul style="list-style-type: none"> <li>This new report analyzes the objects on your system and compares them to the Implementer repository to check for backdoor changes to your production systems.</li> </ul>   |
| Environment Object Report                      | <ul style="list-style-type: none"> <li>A new detailed report listing all the objects in an environment is now available.</li> </ul>   |
| Enhanced overall reporting                     | <ul style="list-style-type: none"> <li>Numerous reporting changes provide new options and additional audit-related data in key reports and panels.</li> </ul>   |
| <b>MKS Integrity</b>                           |   |
| Launch MKS Integrity Manager client            | <ul style="list-style-type: none"> <li>From the Host-based interface issues may now be accessed directly via MKS Integrity browser or client interfaces.</li> </ul>   |
| <b>Archiving</b>                               |   |
| Enhanced back up options                       | <ul style="list-style-type: none"> <li>Host and remote archives are now supported for granular back up of archives. Media initialization is now optional.</li> </ul>  |
| <b>Developer Productivity</b>                  |   |
| Common developer panels enhanced               | <ul style="list-style-type: none"> <li>Work with Objects has enhanced filtering.</li> <li>Developer Workbench has a number of usability improvements.</li> </ul>  |
| <b>3<sup>rd</sup> Party Integrations</b>       |   |
| CA AIfusion 2E                                 | <ul style="list-style-type: none"> <li>CA AIfusion 2E 8.1 SP1 is certified</li> <li>Enhanced comparison options</li> <li>Changing of function built over a *Template file is supported</li> <li>Enhanced multilingual support</li> <li>Mass lock change command line changes</li> </ul> |
| Oracle's PeopleSoft World (JDE World Software) | <ul style="list-style-type: none"> <li>Enhanced multiple DreamWriter/FASTR version support</li> </ul>   |

|  |   |
|--|---|
| LANSA                                  | <ul style="list-style-type: none"><li>▪ LANSA 11 is certified</li><li>▪ Enhanced multi-library support</li><li>▪ Enhanced LANSA process and function support</li></ul>  |
| <b>Command Line Interface</b>          |   |
| New Create Project command             | <ul style="list-style-type: none"><li>▪ New Create Project command allows projects created to be created via embedded processes.</li></ul>  |
| Numerous other changes                 | <ul style="list-style-type: none"><li>▪ A total of 3 new commands and 10 enhanced commands are included in this release.</li></ul>  |
| <b>Documentation</b>                   |   |
| Multiplatform Guide eliminated         | <ul style="list-style-type: none"><li>▪ The content of this manual is now blended into the User Guide and Administrator Guide to provide the information where it is most needed.</li></ul>                         |
| <b>Product Installation</b>            |   |
| Implementer now available for download | <ul style="list-style-type: none"><li>▪ Implementer may now be downloaded directly from the mks web site. Full product packaging with CDs and printed documentation are still available to all customers.</li></ul> |
